

XMRig AUT Instructions: File Format

Written by Jackson Zenisek

©XMRig Automation Utility Tool

XMRig AUT Navigation Tree:

Launching XMRig AUT:

Before you can launch XMRig AUT, you may need

to enable execute permissions for the file. To do that run this command:

```
chmod +x xmrig_automation_utility_toolAUT.sh
```

To launch XMRig AUT, run this command:

```
sudo ./xmrig_automation_utility_toolAUT.sh
```

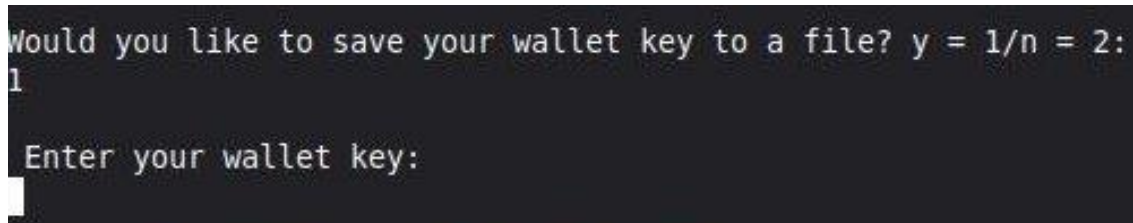

Selecting Options:

To select the option you want, enter the designated number that is associated with that option. For example, if you want to Install XMRig, enter "1" and press enter.

```
Choose an option:
1) Install XMRig
2) Run XMRig
3) Generate new Monero wallet
4) View user guide
1
```

Yes or No Prompts:

When encountering a yes or no prompt, enter "1" for yes and "2" for no. For example, if you want to save your wallet key to a file so you can view it later, enter "1" for yes.

A terminal window with a dark background. The first line shows a prompt: "Would you like to save your wallet key to a file? y = 1/n = 2:". The second line shows the user input "1". The third line shows a new prompt: "Enter your wallet key:". The cursor is at the end of this line.

```
Would you like to save your wallet key to a file? y = 1/n = 2:
1
Enter your wallet key:
```

Entering the directory to install XMRig or Monero wallet generator:

For ease of use, XMRig AUT can find nearby directories to install applications. You may enter the directory that you would like the applications to be installed in. For example if you want to install XMRig, depending if your current directory has sub folders within it, XMRig AUT wil display

these sub folders as options to install XMRig in:

```
Here are some nearby folder options:  
/home/jackson/Desktop/XMRigfiles (current directory)  
monerowal/  
xmrigexecute/  
  
Enter the directory that you want to install XMRig in:  
/home/jackson/Desktop/XMRigfiles/xmrigexecute  
Are you sure you want to install XMRig in /home/jackson/Desktop/XMRigfiles/xmrigexecute ? y = 1/n = 2  
1
```
